To Whom It May Concern:

Victory Engines builds impressive engines to fulfill every driver's particular needs. As a asphalt winged sprint car driver, 900 horsepower engines are necessary to stay competitive with other racers. My Victory Engines make power, but are also extremely reliable. In the past two years, racing in the Must See Xtreme Sprint Series and HOSS/Auto Value Series, I have been able to stay competitive and have gained numerous titles: track record holder at Oswego Speedway and Five Flags Speedway, feature wins, and several fast qualifying times. Myself and other individuals are very much impressed and satisfied with the engines built by Victory Engines. I would highly recommend Victory Engines to others in need of a reliable, dominant engine.

Sincerely,

Jason Cox Racing
